OUR FREE DELIVERY OFFER

\$5 ORDERS FREIGHT PAID

If you make up an order from this Catalog, or from our periodic Sale Catalogs, amounting to \$5 or over, we prepay all freight charges to your nearest railway station. This applies to all railway points in the areas included in the map on this page.

EXPLANATION OF PREPAY ZONES

This catalog serves a very wide area covering all the Province of Ontario and all Quebec except the Gaspé Peninsula. On many items, where only one price is shown, the delivered cost is the same all over this territory. But on certain heavy goods the freight charges we have to pay on distant shipments are so much higher that, we have to grade the price according to distance. To arrange this difference in shipping cost fairly to our many customers, we have divided this whole area into Prepay Zones varying in distance from Burlington; thus CIRCLE ZONE, SOUTH ZONE, NORTH ZONE, WEST ZONE. The map will show you in which ZONE your railway station is located.

SHIPMENTS TO BOAT POINTS

MANITOULIN - - - - MUSKOKA

During Navigation season we pay freight including boat charges on \$5 orders to boat points in Manitoulin Island and Muskoka Lakes, at SOUTH ZONE prices. In the closed season we ship to nearest railway station.

CIRCLE ZONE EXTENDED

Our Circle Zone is a smaller area close to Burlington including all of the Niagara Peninsula, and now extending eastward from Toronto along No. 2 Highway as far as Oshawa, also along No. 12 Highway from Whitby to Brooklyn, Westward on No. 7 and 4 HIGHWAYS through to Markham, Brampton, Guelph, Kitchener, Stratford and St. Mary's, London, and Port Stanley. Circle Zone includes all railway points within the area described, and clearly defined in the Circle Zone Map at left.

OUR GUARANTEE PROTECTS YOU FULLY

30 DAY INSPECTION PRIVILEGE

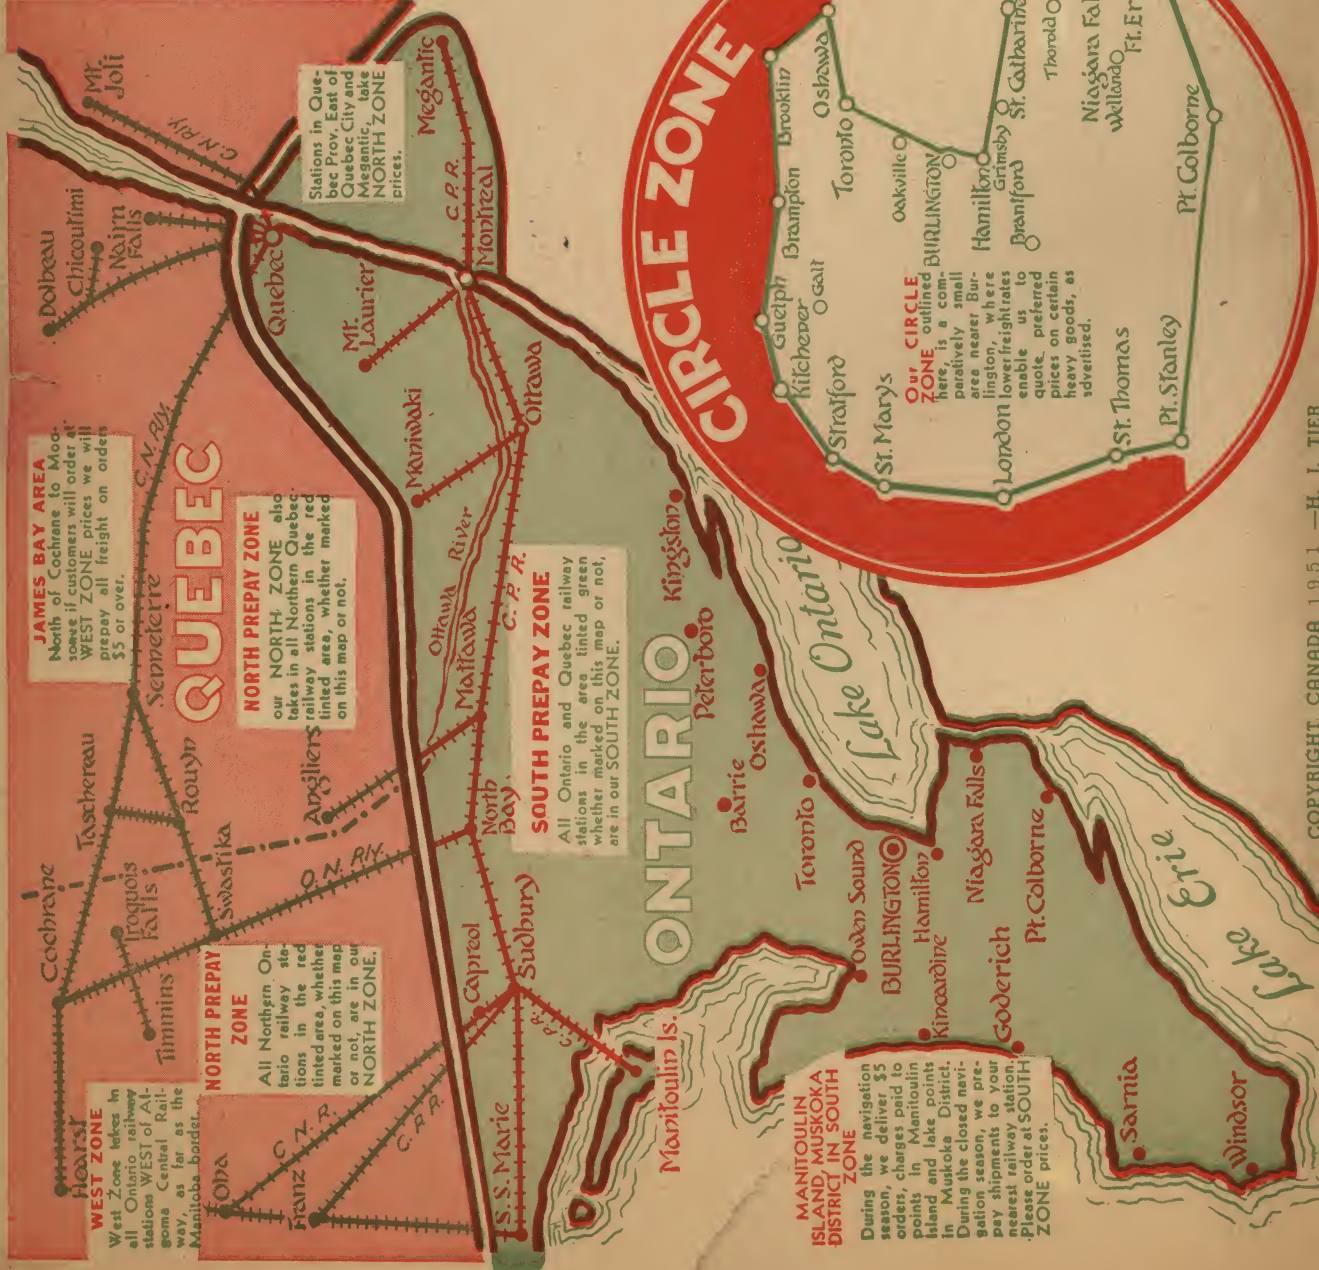

Halliday goods are always sold on "Satisfaction or Money Back" basis. We stand behind everything we sell to the extent that we will refund your money if after full examination the materials supplied prove unsatisfactory for any reason. Just one stipulation, goods returned for refund must be reshipped within 30 days of receipt, and written notice sent. We allow you ample time to inspect and test the value of your purchase and satisfy yourself that our goods are fully as represented, and satisfactory for the purpose intended.

NOTE: Special, made to order goods cannot be accepted for refund.

CASH WITH ORDER SAVES MONEY

On the strength of the above Guarantee, you can safely send full cash with your order and save the special fee that the carrying company always charges on C.O.D. shipments. If however you prefer to see your goods before you pay, we will gladly send your order C.O.D. to be paid for only when you are satisfied that the goods are as represented and described in our catalog.

NOTE: We cannot ship orders C.O.D. to flag stations or boat points, nor can we be responsible for the safety of any goods forwarded at flag stations.

Mail Order...

THE EASY WAY to order BUILDING MATERIALS FOR NEW HOMES REPAIRS - ALTERATIONS

You save money, time and energy when you order your Building Materials direct from the Halliday Catalog. It's an easy, safe and sure way of purchasing materials of guaranteed quality that can be depended on for durability and satisfactory service.

Simply thumb through the pages of the catalog, jot down the items required at the low delivered prices stated and mail.

...ONE RESPONSIBILITY...

Instead of shopping around from place to place purchasing one item here, another there, you make out one easy order for everything needed and pay only the low price marked in the catalog, and remember, we pay all freight charges on orders of \$5 and over. See Free Delivery offer and map of Prepay Zones page 2.

Our warehouses are conveniently located on railway sidings where cars can be loaded right out of the warehouse, a big factor in cutting handling costs. Carloads of freight are loaded daily for quick distribution to distant points, and for closer in deliveries we maintain the familiar fleet of red and yellow trucks which are kept constantly on the go in the interests of better service.

Many customers however, prefer to come to Burlington and pick up their orders and for these we have established a special pick-up order system designed to save time. On large orders if you plan to come to Burlington, we suggest you send details and wait for instructions as to delivery date, before you call.

HALLIDAY **SIMPLEX** SYSTEM PREFABRICATED HOMES

Hundreds of satisfied Home owners have found that the speed and ease of erection of Halliday Simplex Homes saves many dollars and weeks of time. If you're planning to build a new home it will pay you to investigate this modern way of purchasing complete materials on one order at one low delivered price.

Our book of Simplex Prefabricated Homes is free to home builders in Ontario and Quebec. In it you will find many attractive homes of modern design, homes planned for comfort and convenience at prices that mean a distinct saving. A copy will be mailed free if you plan to build this year.

HALLIDAY **CEDAR** CLAD SUMMER COTTAGES

With a Summer Cottage of your own hidden away in a favourite spot by lake or stream, or back in the woods, you always have a place to go for rest and relaxation and the investment required is very modest.

In the Halliday 1951 Summer Cottage Supplement you will find small cabins that can be built for less than \$200, small family cottages for a few hundred as well as large commodious summer homes up to 6 rooms.

Halliday 1951 Summer Cottages, ready-cut or prefabricated feature new massive Cedar sidings, a modern touch that adds distinctive beauty combined with lasting durability. Plans, pictures and delivered prices are shown. Write for Free Copy.

HAMILTON - TORONTO OFFICES

In Hamilton and Toronto we operate modern, teletype service, order offices for the convenience of local customers, who wish to consult us before placing orders. These offices have direct connection with the warehouse at Burlington and orders are handled without loss of time. Note addresses below.

Free STEP-BY-STEP HOW-TO-DO-IT BOOKS

You can make important savings on any building operation by doing part of the work yourself. Most jobs are simple if you have the "know-how," and these free booklets have been prepared to show you just how to go about the work you have in mind. We issue "Step-by-Step" Instruction Booklets as an EXTRA SERVICE to our customers, covering the following — ROLL ROOFING, ASPHALT SHINGLES, HARDWOOD FLOORS, MASTIC TILE FLOORS, GYPSUM BOARD, HOW TO USE PLASTIC and METAL MOULDINGS, HOW TO FIX A LEAKY ROOF and SEPTIC TANK SYSTEMS. Copies of these booklets are sent free with each order of goods concerned or the complete set will be mailed on receipt of 25c. Other booklets are in preparation and will be issued from time to time.

INSIDE DOORS OF FIR, PINE, AND BIRCH

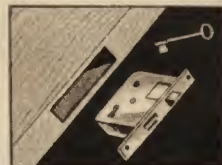

ALL GOOD QUALITY DOORS

Choose your Inside Doors from this page and save money at our low, direct-to-you, freight paid prices. All Fir panels may have occasional neat patches but should be suitable for stain or varnish. If you're ordering doors for a new building and require the Frame, Trim, and Hardware, order them COMPLETE, the easy way, see next page.

WE CUT LOCK MORTISE FREE If you order hardware

As an extra service to our customers who order hardware with their doors, we cut the lock mortise FREE. We mortise doors 3 feet from floor to spindle. If you do not require hardware we will mortise your door on request. Inside doors 15c, outside doors 25c extra. State size of mortise. We ship all doors carefully packed and pay freight charges.

See Page 12

STUCCO FRAMES

Our standard "stucco" frames are made for use where metal lath is nailed direct to sheathing or where only a $3/8"$ thick lath is used for strapping. Stucco Frames are also suitable when BRICKLIKE SIDING or INSULBRIC is used as outside finish. Frames rabbetted for stucco or Insul Bric add 50c.

NOW READY-WINDOW UNITS BUILT with PRE-FITTED SASH

WE SEND THE GLAZED PENTOX TREATED SASH READY FITTED IN THE FRAME, INSTALLED WITH SPIRAL SASH BALANCES, Also the sash lock, sash lift and window stops. All built up ready to instal.
ALL SASH GROOVED FOR WEATHERSTRIP—See Page 15

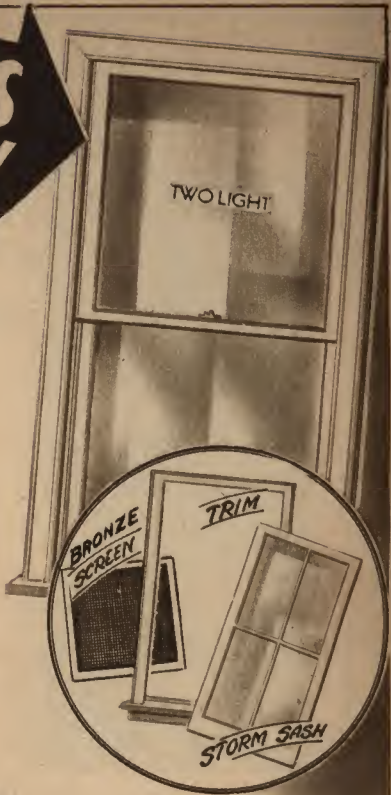

Here's the new up to date way to order the windows you need for new buildings. It's an easier way to buy windows, because we build up the frames and carefully fit the sash in our work shop, then we place and adjust the easy working Spiral Balances and apply the Sash Lock and Lift. All work is done by skilled workmen in our shops. You get a better built and better fitting window ready to instal by nailing in place.

CHOICE OF SASH AND FRAMES

We make up these Unit Windows to your order with your choice of 2 light, 4 light or Cross Bar style Check Rail Sash made of 1 3/8" pine, Pentox treated, and ready glazed. The Frame may be for standard Frame Wall, Stucco, Brick Veneer, or Solid Brick walls as ordered. Spiral balances are fitted to the lower part only of each sash.

SCREENS, STORM SASH, INSIDE TRIM

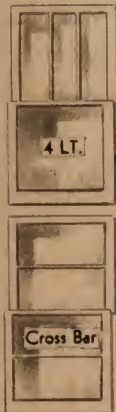

The list below shows our low delivered prices on the complete built up window units delivered freight paid. We also show prices for pre-fitted Storm Sash and Half Screens with Hardware consisting of Hangers and Hooks and Eyes. Price of ready-cut inside Trim made of B.C. Fir 3/4" x 3 1/2" in Back Band design is also given. Trim is shipped bundled.

ELEVEN SIZES THREE STYLES

TWO WAYS TO BUY GLAZED SASH ALONE OR COMPLETE

When planning new buildings, additions or alterations, always choose standard stock windows from the wide range of sizes listed here. It will save you money and ensure quick delivery from our large stocks.

Halliday's superior windows are made of sound pine 1 3/8 inches thick, dipped in PENTOX preservative to check rot and serve as a primer, saving one coat of paint; the sash are then glazed with clear glass. All orders carefully packed by experts, and we guarantee safe arrival. The check-rail windows or pair sash on this page are made to slide up and down and are provided with rebatted check rail.

Below we show our low prices for the glazed Sash alone or the Window Complete with Frame, Trim and Hardware. Your choice of three styles shown TWO LIGHT or FOUR LIGHT and CROSS BAR. All windows with same total glass area are the same size overall. Read below at left what we send when you order windows COMPLETE.

GLAZED SASH ONLY

1435—TWO LIGHT.

1436—FOUR LIGHT.

1411—CROSS BAR.

The table below shows Glass Size and Overall size. Glass Size given is the size of total glass area in lower light. Top and bottom units are same size.

Prices are delivered cost in SOUTH ZONE. In NORTH ZONE add 25c. WEST ZONE add 45c.

HARDWARE SUPPLIED FOR TWO WINDOWS ONLY

COMPLETE CASEMENTS

The price lists at left for Complete Casements and Casement Groups shows the cost for the Window chosen, COMPLETE with Glazed Sash, Ready-cut TRIM in clear fir, backband design; ready-cut FRAME (open out) also hardware consisting of HINGES, CATCH, and ADJUSTER in brass finish.
Frame and Trim shipped bundled.

ORDER YOUR STORM WINDOWS EARLY. DON'T BE DISAPPOINTED

VERANDA and SUN PORCH WINDOWS

Turn your veranda into a delightful Sun Room, or enclose the back porch and so add a bright sunny room at moderate cost. A pleasant place to work or entertain friends, a sunny spot for your favorite plants, and a buffer against cold winds in bad weather.

We supply these windows especially for this purpose, but they may also be used as regular casement windows. They're made of $1\frac{3}{8}$ " pine, dip treated in Pentox to assure long service, and ready-glazed with clear glass.

THREE WIDTHS—ONE HEIGHT

It's easy to arrange pleasing groups of these windows to fit into almost any opening. They're made in three different widths, and one uniform height in the attractive four light design shown. Shipped carefully packed, safe arrival guaranteed.

\$5 ORDERS FREIGHT PAID

1439—Four Light Veranda Windows in three sizes, all sizes $4'6\frac{3}{4}"$ high. Width given, also glass sizes. We pay freight orders of \$5 or over.

MAKE YOUR OWN SCREENS

MADE TO MEASURE

SCREENS

We make your Screens of sound lumber $\frac{3}{4}" \times 2\frac{1}{4}"$ with corners secured with ziz-zag fasteners. Choice of bronze or green painted screen fasteners. Choice of bronze or green painted screen fasteners with staples and neatly trimmed. Made full size of window or half size. With half size screens we send filler piece to fill opening between sash and screen. Prices shown in chart below.

HOW TO USE CHART

Find the square at top of chart that corresponds with WIDTH of opening and type of wire you wish. Follow down that column till you come opposite square corresponding to HEIGHT. The price shown in that square gives you the cost of your screen as described above.

NOTE:—If your sizes do not correspond exactly with chart sizes, take the next larger sizes to find cost. Always give width first, then height. State if full or half size. Send 50c deposit with each screen ordered or full cash.

STANDARD THICKNESS OF WALLS
All Halliday Ready-Cut Window Frames for pair sash or casements are made to suit walls of standard thickness as shown and described here. If your walls are not standard please give details and add EXTRAS as below.

NOTE: Frames for all types and thicknesses of wall are made with 5 3/8" jambs.

Standard Frame Walls are made up of:—Studding 3 3/4", Lumber sheathing 3/4", Lath and plaster inside 3/4". Thickness not counting siding or other exterior finish 5 3/8".

These walls are the same as Frame Walls except for the exterior finish material. Thickness: Studding 3 3/4", Lumber Sheathing 3/4", Lath and plaster inside 3/4", total thickness not counting stucco or insul bric 5 3/8".

NOTE: FRAMES FOR ALL TYPES OF WALL CONSTRUCTION HAVE 5 3/8" JAMBS.

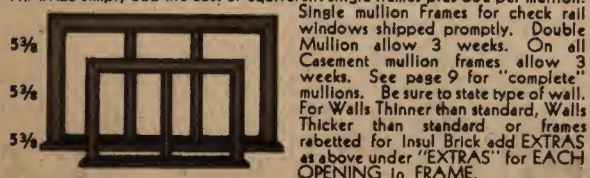

BRICK VENEER
These are regular frame walls with brick finish on outside. Thickness: Studding 3 3/4", Lumber sheathing 3/4", Lath and Plaster 3/4". Total thickness not including brick 5 3/8".

SOLID BRICK OR CEMENT BLOCK
Standard thickness. Bricks or blocks 8", strapping 3/4" Lath and plaster 3/4". Total 9 1/2". Frames for standard brick or block walls are made with jambs 5 3/8".

EXTRAS FOR NON-STANDARD WINDOW FRAMES
For walls THICKER than standard add for each inch or fraction of extra thickness: **80c**
For Walls THINNER than standard allow extra per FRAME: **50c**
For Frames rabbetted for Insul Bric or Stucco add each frame **40c**
If cambers are wanted for brick or brick veneer walls add: **60c**

READY-CUT MULLION WINDOW FRAMES

Frames to take two or more windows are divided by a "mullion". The picture shows a single Mullion Frame which takes 2 windows also a double mullion frame which takes 3 windows. To get the price of MULLION FRAMES simply add the cost of equivalent single frames plus 65c per mullion.

NOTE: Casement frames made to OPEN-OUT. If wanted to OPEN IN, add 1.50 single mullion, 2.50 double mullion.

NOTE: Mullion frames for pair sash are now made with narrow, 1 5/8" mullions suitable for use with Spiral Balances. The use of narrow mullions adds to the glass area and provides better lighting conditions.

READY CUT WINDOW FRAMES SHIPPED QUICKLY

Halliday ready-cut Window Frames are made of selected knotted white pine, with outside casings 2 1/2" wide by 1 3/8" thick to accommodate regular standard 1 3/8" storm windows which can be hung without need of rabbeting. All parts are accurately cut to fit, and shipped bundle ready to nail together, inside window stops included. We also send printed diagram showing how to assemble the frames.

All window frames are made to regular standards for walls of usual thickness as described at top of page.

In Ontario and Quebec we send frames made to recognized Ontario standards.

TRIM FOR MULLION WINDOWS

We can supply Ready-Cut Trim as described above for Mullion Windows, or windows in Pairs or Groups of Three or Four. For prices take the price of single window trim and multiply by number of windows in opening. Thus trim for SINGLE MULLION window (group of two) will cost twice that of a single window of same size. DOUBLE MULLION TRIM (group of THREE) will cost three times that of single window. When ordering Mullion Trim for Casement sash STATE WHETHER FOR OPEN IN OR OPEN OUT windows.

FRAMES TRIM for INSIDE DOORS ARCHWAYS

We supply Inside Door Frames and Trim in ready-cut sets, all parts neatly cut to size, ready to nail with slides neatly grooved for head. Made of practically clear B.C. Fir, suitable for stain and varnish finish, or may be painted or enameled. Frames made for use on standard 5 1/4" or 5 1/2" walls, see note below. Door Stops supplied with Frames. Archway Frames sent without stops. Door Trim made in popular Back-band style with allowance for mitreing. Frames and Trim SHIPPED BUNDLED, \$5 orders freight paid.

PRICE OF INSIDE DOOR FRAMES AND TRIM

ORDER YOUR STORM WINDOWS EARLY. DON'T BE DISAPPOINTED

STORM WINDOWS

MORE IMPORTANT THAN EVER

Whether you use wood, coal or oil to heat your home, the need for Storm Windows is greater than ever because of the increased cost of fuel. Users have proved conclusively that Storm Sash actually cut fuel bills as much as one fourth and more, besides making rooms warmer, less drafty.

ALL WINDOWS PENTOX DIPPED TO CHECK ROT

Order your Storm Windows direct from this list, and save money. They're superior windows made of sound pine 1 3/8" thick, treated with Pentox preservative to check rot and serve as a priming coat, then ready glazed with best clear glass. Halliday Storm Sash are made extra heavy and may be safely trimmed half inch off width and one and a half inches off length, thus with trimming there is a size to fit practically all openings.

All orders safely packed, safe arrival guaranteed. We pay freight orders of \$5.00 or over

INSULATE *with* FIBERGLAS

NEW LOWER PRICES

Ask any of your friends and neighbors who live in insulated homes, they'll tell you that the small cost is quickly repaid in added comfort and lower heating costs. That is because insulation properly applied checks heat losses through walls and ceilings, keeping homes warm in winter and cool in summer. We recommend Fiberglas Insulation because it possesses to a high degree, the qualifications required for efficient protection. Our new lower prices mean bigger savings for our customers.

NEW PRE-CUT FIBERGLAS ROLLS

This new and improved form of Fiberglas provides efficient, easily applied insulation and Vapor Seal combined. It's the popular roll or blanket style with the rolls made with paper wrapped Fiberglas pre-cut in 4 foot lengths and faced with a continuous strip of moisture-proof paper to form a ready applied vapor barrier. The rolls may be applied in continuous form or quickly separated into standard 4 or 8 foot batts by cutting the moisture proof paper only.

TWO INCH PRE-CUT ROLLS

1290—Fiberglas Insulation in new Pre-cut Rolls, 2 inches thick, width 15 inches. Bags contain 48 feet in continuous strips (pre-cut to 4 feet) covering 60 sq. feet. Price per Bag \$5 orders delivered in SOUTH ZONE..... **3.35**

NORTH ZONE..... **3.65** WEST ZONE..... **3.85**

THREE INCH PRE-CUT ROLLS

1291—Pre-cut Fiberglas Rolls 3 inches thick, 15 inches wide in bags containing 32 feet in continuous strips covering 40 sq. feet. Price per Bag \$5 orders delivered in SOUTH ZONE..... **3.10**

NORTH ZONE..... **3.40** WEST ZONE..... **3.65**

FIBERGLAS HANDY BATTS

1292—Genuine Fiberglas in unwrapped "Handy Batts" full 3 inch thick. Size 15" x 11 1/4" for placing between studs or ceiling joists. Bags contain 27 pieces, covering 30 sq. feet 3 inches thick. Our price per BAG delivered (\$5 orders) in SOUTH ZONE..... **2.05**

NORTH ZONE..... **2.35** WEST ZONE..... **2.55**

LOOSE FIBERGLAS

1289—Genuine Fiberglas Insulation in loose form for pouring between ceiling joists etc. or for stuffing in to odd corners where batts can't be used. Bags contain enough to cover 15 sq. feet 4 inches deep or 30 sq. feet 2 inches deep. Not suitable for blowing. Our price per BAG \$5 orders delivered in SOUTH ZONE..... **1.40**

NORTH ZONE..... **1.60** WEST ZONE..... **1.80**

CAULKING CEMENT

1294—Black Caulking Cement to be forced into cracks and crevices around door and window frames in brick buildings. Checks drafts, saves fuel. A gallon will do from 8 to 10 openings. Price per QUART..... **63c**
GALLON..... **1.45**
FIVE GALLON..... **4.60**

GRAY CAULKING

1295—Superior quality Gray Caulking Cement which may be painted. Price per QUART..... **80c**
GALLON..... **2.75** FIVE GALLON..... **13.35**

RENT A GUN

1290—Send (\$5.75) the price of this strong Caulking Gun with your order. Return it in two weeks in clean condition. Charges prepaid and we refund 4.75 Rental cost, only 1.00. After two weeks we charge 50c per week.

WEATHERSTRIP TUBULAR

50121—Leatherette covered, tubular Weatherstrip cotton filled. For doors and windows, checks drafts. Box of 20 feet with tacks..... **65c**

WARM FELT

50123—Thick Felt to keep out cold drafts around doors and windows. Box of 20 feet with tacks price..... **45c**

DOOR BOTTOMS

50122—Popular spring action Door Bottom checks underdoor drafts. Closing of door automatically forces a felt apron down against sill. Fits door up to 3 feet wide. Price with screws and directions..... **1.65**

Authorities agree that a Vapor Barrier is essential when insulating Walls or Ceilings. In Walls the Vapor Barrier is ALWAYS placed on the INSIDE after applying insulation and immediately under the wall finish. In CEILINGS the Vapor Barrier should be tacked to UNDER side of ceiling joists before the ceiling finish is added, the insulation being placed from above.

SPECIAL VAPOR BARRIER

12118—A very effective Vapor Barrier at a moderate price. Made of heavy Kraft paper waxed on one side and rib coated on the other with a special vapor barrier compound. Should be used on all insulated walls and ceilings. Rolls 36 inches wide covering 500 sq. feet. Price per ROLL, \$5 orders delivered South Zone..... **4.50**
North Zone..... **4.65** West Zone..... **4.80**

RENT A STAPLER

50783—The easiest way to apply vapor seal Fiberglas Rolls and Vapor Barrier is with a hand Stapling Gun. We rent it to you for 10c a day. Deposit required 11.00 refunded less rental when returned to us in good condition. **15c**
50784—Staples for above per strip of 80.... **5.95**
Price per box of 5 thousand..... **5.95**

VENTILATION

Insulated Attics need ventilation to combat condensation of moisture in the cold attic space. At least two permanently open Vents are needed with minimum of one square inch of free opening for each 4 sq. feet of attic area.

VENTILATING LOUVRES

811—Specially made for use in Attic gables. Ready-built of sound lumber with fixed ventilating bars covered with wire mesh to keep out birds and insects. Overall size 12 1/2" x 22". wall opening 9 1/2" x 21" free opening 80 sq. inches. Price each..... **4.50**

IMPORTANT LAID MEASURE PRICES

When comparing prices remember this! All Halliday tongued and grooved floorings, and V matching, also "lapped" sheathing and sidings are sold LAID MEASURE. This means that if you order 100 sq. feet of sidings, 100 sq. feet when laid. We make full allowance for the tongue and groove or "lap", you add no "extras" except a small allowance, usually about one tenth, for cutting waste.

When buying where laid measure prices are NOT the rule, you must allow extra for the lap, as much as 15% to 30% plus the cutting waste. It takes an expert to figure out just how much you need. So remember when you buy at Halliday LAID MEASURE PRICES you get full measure to cover the surface as ordered.

INSTRUCTIONS FREE

LAID MEASURE PRICES

When comparing prices remember this! All Halliday tongued and grooved flooring, also "lapped" sheathing and sidings are sold LAID MEASURE. This means that if you order 100 sq. feet of siding, flooring, etc., we ship enough material to cover 100 sq. feet when laid. We make full allowance for the tongue and groove or "lap", you add no "extras" except a small allowance, usually about one tenth, for cutting waste.

When buying where laid measure prices are NOT the rule, you must allow extra for the lap, as much as 15% to 25%, plus the cutting waste. It takes an expert to figure out just how much you need. So remember when you buy at Halliday LAID MEASURE PRICES you get full measure to cover the surface as ordered.

Prices of floorings and sheathings are by the 100 sq. feet but you may order more or less as desired.

SOUND LUMBER SHEATHING

Remember! When buying tongued and grooved or lapped lumber sheathing, Halliday prices are based on LAID MEASURE, a straight forward, easy way to buy. See full description above.

TONGUED AND GROOVED OR SHIPLAP

1066—This is good quality Sheathing Lumber made from inch boards of Spruce and Jack Pine, containing mostly sound knots, but with an occasional knot-hole. Suitable for wall or roof sheathing or sub flooring under hardwood. Thickness ¾" and in widths 4½" to 7½". Orders filled with one width and our choice of tongued and grooved boards or shiplap. Prices per 100 SQ. FEET LAID MEASURE, \$5 orders freight paid.

BUILDING LUMBER • QUICK DELIVERY

For our customers who require framing lumber: studding, rafters, floor joists etc., in a higher quality than is usually offered, we are prepared to make prompt shipment of a superior grade of Spruce and Jack Pine in sizes and lengths listed below. For the convenience of customers requiring large or small quantities we show prices by the PIECE.

DRESSED FOUR SIDES

All Framing Lumber listed below is dressed on four sides, so that finished sizes will be about 1/4 Inch less in thickness and in width than sizes given. Order any required quantity in sizes and lengths given.

PLEASE WRITE FOR PRICES

At the time of printing this catalog we could not set prices on framing lumber with any degree of certainty due to unsettled conditions in the lumber market. We ask customers to send list of requirements for our quotation on 2x2—2x3—2x4—2x6—2x8 and 2x10 material required for studding, rafters, floor joists, etc.

If available we will be glad to quote freight paid prices on any such material you need.

SHEATHING BOARDS

FINISH WALLS *and* CEILINGS *with* GYPSUM BOARD

INVISIBLE FLUSH JOINTS

1. USE JOINT FILLER TO COVER JOINTS.
2. PRESS TAPE INTO FILLER.
3. COVER TAPE WITH JOINT FILLER.
4. APPLY THIN COAT OF JOINT FILLER.
5. APPLY PRIMER SEALER.

SAVE TIME—SAVE MONEY

You can finish your house inside, and have it ready for occupation a lot sooner if you choose these big panels of Gypsum Board for walls and ceilings. You save both time and money. Gypsum Board is ready-made plaster in sheets, needs only nailing to studs or joists. No waiting for the plastering contractor, no cracking, no wet plaster to dry out, less warping of woodwork, and you have smooth fireproof walls that can be decorated at once with paint or paper after sealing joints with varnish size. Panels are about $\frac{3}{8}$ inch thick and in standard width of 4 feet, lengths as listed below. The edges of each panel are slightly recessed to simplify the making of invisible flush finished joints. See sketches at left. Gypsum Board panels are easy to apply without special tools except the joint knives shown at foot of page. Order nails and filler from list at left.

LOW IN COST, PRACTICALLY NO WASTE

PRICE PER PANEL

\$5 ORDERS FREIGHT PAID

1169—Gypsum Board is made in panels of various lengths as at right, choose the sizes carefully to suit your job and the waste will be negligible. Prices at right are per PANEL, we ship any quantity over TWO sheets and pay freight on orders of \$5 and over.

REMEMBER TO STATE SIZE, COLOR, SECOND CHOICE ETC., WHEN FILLING OUT ORDER BLANKS

BUILD ECONOMICALLY with WALLBOARD*Choice of
3 kinds***COMFORTESTED INSUL-ATING BUILDING BOARD**

Our Comfortested Insulating Building Board is made from wood fibres; sheets are about one-half inch thick. It holds furnace heat inside the house like a warm blanket; stops cold winds, checks heat loss, saves fuel. Use it in new homes for walls, ceilings, partitions. In homes already built its use in the attic will make a noticeable improvement in comfort and will reduce your fuel bills. Can also be applied over old plaster walls.

FOR INSIDE USE

Insulating BUILDING BOARD takes the place of laths and plaster on inside walls. Use it for remodeling attics, bedrooms, etc., and for insulating brooder houses, storage warehouses, etc. The attractive cream colored "rough cast" finish surface requires no further decoration.

AS WALL SHEATHING

As a sheathing on outside walls (instead of lumber) this BUILDING BOARD stops cold winds, checks heat loss and makes a rigid wall at lower cost in labor, as compared with wood sheathing. Use it under wood siding or brick veneer and overlay with waterproof paper.

PRICES PER BUNDLE OR SHEET

Order No. 1213

\$5 Orders Freight Paid

FOOTAGE IN BUNDLES	6 sheets per bundle				
	Size of Sheet	4' x 7'	4' x 8'	4' x 9'	4' x 10'
6 sheets 4' x 7'-168 sq. ft.	SOUTH ZONE	9.90	11.35	12.70	14.15
6 sheets 4' x 8'-192 sq. ft.		Sheet 1.72	Sheet 1.90	Sheet 2.21	Sheet 2.46

SUNDRIES**JOINT TAPE**

50113 — Tough buff color gummed paper TAPE, used over joints. Price per roll of 150 running feet. 35c
2" wide...

PANEL STRIPS

1174 — PANEL STRIPS of clear wood, free of knots. We always recommend paneling walls when applying wallboard, etc. Strips are 5/16" thick, shipped in random lengths. Per 100 running feet.
5/16" x 3.75
1 1/2" x 3.95
1 3/4" x 3.95

NAILS

50119 — Large Head NAILS, size 1 1/2" for thick Insulating Board. One pound to 65 sq. ft. Price per pound. Galvanized for inside or outside use. 18c

5039 — Finish NAILS. If joints of thick Insulating Board are not to be covered, use 1 1/2" wire finishing nails driven at an angle, 1/2" from edges and slightly countersunk. Per pound for 100 square feet. 15c

SHOULD I USE WALLPAPER?

We do not recommend applying wallpaper over Wallboard, unless the joints between sheets are later covered by a panel strip to conceal the crack, which often appears in wallpaper due to shrinkage of wallboard from the intensely dry house heat of winter months. The danger of shrinkage is less with Comfortested Board and many customers have used wallpaper over this board with good results.

USE VELVETINT

For decorating Wallboard, we recommend our VELVETINT
See page 33.

**GREEN TINTED WALLBOARD**

READY SIZED

Our WALLBOARD is made from high grade, heavy stock, about three-sixteenths inch in thickness, ready-tinted, pebble grained and sized. It comes to you in big, ready-to-use sheets four feet wide, which can be nailed to walls or ceilings. One side is colored in pleasing light green; the other side is cream color. Use the green side for walls, cream side for ceilings, or run one color part way up the wall with a "drop ceiling" in the other tint. You'll be delighted with results.

POPULAR LOW COST AERTITE BOARD

Use this insulating Aertite Wall Board as an economical finish for lining attics, summer cottages, garages, poultry houses or for making partitions and enclosures. It's ideal for use as temporary wall and ceiling finish to be replaced later by plaster or gypsum board. It's easy to apply and presents an attractive appearance for the purposes mentioned.

LOW COST INSULATION

Aertite Board is made with a double fluted cone with heavy Kraft paper between, and faced both sides with kraft paper, presenting a smooth and pleasing light brown finish. It can be decorated with water paint after sizing. Because of the many air cells locked between the corrugations, Aertite Board serves as effective insulation against heat loss, comparing favorably with other materials costing much more.

PRICE PER BUNDLE 320 SQ. FEET

1242—This is the best 'A' weight Aertite board made with extra heavy Kraft paper; sheets are all 4 feet wide 8 feet long and about 1/4" thick. Packed in bundles of ten sheets, 320 sq. feet. We cannot break bundles. Price per BUNDLE delivered freight paid to nearest railway station.

Choose Beautiful Mastic Tile

FOR YOUR FLOORS

SO EASY TO LAY YOU CAN DO IT YOURSELF

Hallidays Mastic Tile, the modern floor covering, combines colorful beauty, durability, with low cost and ease of application. They may be applied over any smooth surface, and they're easy to keep clean and immaculate. Here's the solution to the flooring problem for new homes and for refinishing old floors that you can follow with true economy and satisfaction.

ILLUSTRATED INSTRUCTIONS FREE

With every order of Mastic Tile we send our copyrighted instructions free. It shows step-by-step just how to go about the job, and many customers have laid fine looking floors with complete satisfaction. If you prefer to have the work done, the instructions help you to see that the tiles are properly laid.

HOW MANY TO ORDER

Hallidays Mastic Tiles are made in one uniform size, 9 inches square and $\frac{1}{8}$ " thick. To find the number required measure the length of the room in inches and divide by 9. That gives the number of tile in one row. Then measure the width in inches and divide by 9 for the number of rows. Multiply the two figures together and the answer is the number of tiles required. Add about 5 per cent, for fitting and cuttings. If in doubt send us a diagram of your floor with all measurements for free estimate.

A WIDE CHOICE OF NEW COLORS

The first color mentioned is the predominating color on each tile.

12802—Brown and White	12827—Solid Brown	8c
12801—Black and White	12821—Solid Black	
12809—Light Green and Cream	12859—Solid Light Green	12c
12804—Tile Red and White	12858—Solid Tile Red	
12816—Gray and Black	12860—Solid Gray	
12813—Light Buff and Ruby	12833—Solid Light Buff	
12812—Light Blue and White and Dark Blue.	12832—Solid Light Blue	

Maintenance Instructions are included in each order.

COLORS AND SAMPLES

Arrange your own color scheme with actual tile samples. Send 25c for samples showing full range.

COLORFUL TILEBOARD FOR YOUR WALLS

EASILY APPLIED

These Tileboard panels are made by a wonderful new process that produces a beautiful, hard wall finish that has all the appearance of real tile. The panels are made of a strong, tough material called "tempered board", marked off in 4 inch squares, then factory finished with a hard, polished enamel surface over several applications of filler and primer. The panels come in two easily handled sizes, and can be applied in new work or over old plaster or wallboard. Easy directions sent with every order.

ATTRACTIVE COLORS

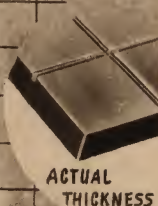

1215—Tileboard Panels can be supplied in the two sizes below and in the following color combinations. WHITE with BLACK markings, IVORY with WHITE markings, GREEN with WHITE markings, TEA ROSE with WHITE markings and BLUE with WHITE markings. Also in BLACK with WHITE markings at the same price. Be sure to state SIZE and COLOR wanted when ordering.

READY-CUT GARAGES

ALL MATERIALS FREIGHT PAID

We supply all materials to build these well designed Garages at one low freight paid price, and guarantee sufficient of all items to erect them complete as pictured. We send all framing lumber, plates, studs and rafters ready-cut to fit, sound cove siding for the walls, tongued and grooved sheathing boards for the roof sent in random stock lengths to be cut on the job, also all nails in necessary sizes and kinds. No floor supplied. Doors are ready built as pictured, supplied with all hardware as detailed below. Colored Roofing supplied with nails, cement and directions. We also send detailed blue prints. Posts for foundation to be supplied by customer.

STANDARD SPECIFICATIONS

In most sections of Ontario and Quebec our Standard Garages are acceptable. Materials sent will build a strong, rigid garage, well suited to its purpose, a building that will give every satisfaction. But in some districts regulations demand heavier framing, the extra cost for material to meet such specifications is shown below.

Standard specifications are as follows.

Studs and Rafters 2" x 3" at 24" centres (Delaware has 2" x 4" Rafters); top and bottom plates 2" x 3" all ready cut. **Walls** 3/4" Cove Siding in random lengths. **Walls** approximately 7 feet high. **Roof Sheathing** of tongued and grooved lumber in random lengths. **Doors** are ready built as pictured. **Roofing**, All Garages are supplied with our heavy 90 lb. Rockfast Roofing in Redtone, Greentone or Blue. All nails and cement supplied. **Door Hardware**—Bruce Garage is supplied with a complete set of Swing Door Hardware. Delaware Garage has overhead type doors for which we send a complete set of Overhead Door Hardware.

POLISHED ALUMINUM MOULDINGS

THE SMART FINISH FOR YOUR KITCHEN

Your kitchen will look brighter, cleaner if you trim around your cabinets with these brightly gleaming Aluminum Mouldings. It's the truly modern finish that you see so much in the smart home magazines. The mouldings come ready punched for screws and nails which we supply, and most have hidden nailing, no nails show. Lengths of 4', 8' and 12' only, but with careful planning and choice of lengths there's little waste. All mouldings are made to take linoleum or other finish $\frac{1}{8}$ " thick.

STEP BY STEP INSTRUCTIONS

You can apply Aluminum Mouldings yourself, our Free Instructions show Step-by-Step, just how to proceed. How to measure, how to turn square or round corners, and apply the linoleum top and fit around sink etc. Sent free with each order.

ALL MOULDINGS SOLD IN 4'-8'-12' LENGTHS ONLY

READY SINK BORDERS MADE

HOW TO MEASURE

When ordering Sink Borders give the overall size of sink measured across the rim at top, width first then length.

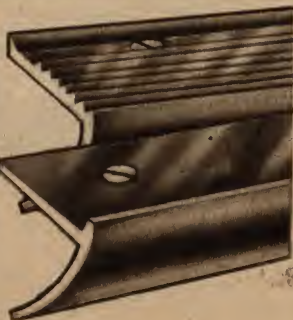

50362—Use these Sink Borders to trim around the sink to cover the joint between linoleum top, and rim of sink. Free instruction book tells how to do the work and apply linoleum. These Sink Borders are made of polished aluminum to take $\frac{1}{8}$ " inch linoleum, choice of five sizes to fit standard flat rim kitchen sinks.

Sink Size 16" x 24"	Sink Size 18" x 24"	Sink Size 18" x 30"	Sink Size 20" x 30"	Sink Size 20" x 32"
1.85	1.90	2.10	2.20	2.25

CUPBOARD DOORS AND DRAWERS

We offer a wide range of sizes in two styles as below. All doors made with the popular lipped and rabbetted edge for easy fitting. The lipped edge hides any slight inaccuracies in the cupboard framework. Use offset hinges with these doors.

DE LUXE FLUSH FRONT DOORS

Use these smart looking doors to give the modern appearance to your kitchen cupboards. They're made with a strong wood frame covered both sides with a panel of smooth brown hardboard. May be finished with paint or enamel any color desired. All doors $\frac{3}{4}$ " thick with edges lipped and rabbetted $\frac{3}{8}$ ", light and easy to handle yet strong and rigid in construction.

PANEL STYLE DOORS

These Cupboard Doors are made with the main frame of clear pine $\frac{3}{4}$ " thick and an inserted panel of plywood. Edges are lipped and rabbetted $\frac{3}{8}$ " for easy fitting.

TWO STYLES TWO WIDTHS

1370—Flush Front—1369—Panel Style

Width	18"	18"	18"	18"	18"	18"
Height	18"	24"	30"	36"	42"	48"
Flush Front	1.80	1.90	2.30	2.75	3.20	3.65

NEW REVOLVING SHELVES

These new Revolving Shelves are made for use in the corners of your cabinet, and they provide an amazing amount of shelf space. They're easy to install and are provided with a special elevating device to make easy cleaning possible, or to recover any article that may have fallen behind. No need to build a circular enclosure.
The shelves are made of heavy plywood mounted on a steel centre rod with brass bearings. They operate easily even when fully loaded. Easy to follow directions sent with each unit.

FIVE STANDARD SIZES

13100—All Revolving Shelf Units are made 31 $\frac{1}{4}$ " high suitable for standard 36" cabinet height. Can be cut down or blocked up if cabinet heights differ from standard. Prices delivered freight paid in all Prepay Zones.

BUILD MODERN KITCHEN

**EVERYTHING**

These modern Remodels of your cabinet, The shelves turn ends of canned goods etc.

Easy to Plan—Easy to Build ALL UNITS SHIPPED BUILT UP

With these new Prefabricated Kitchen Cabinet Units you can bring your kitchen completely up to date in quick time and at moderate cost. The most outstanding feature of these new cabinets is the simplicity of the whole arrangement, the various units have been so carefully designed and built that anyone with ordinary "handy-man" skill may undertake the work with the assurance of a satisfactory result. Each separate part is so made that a complete cupboard of any desired length can be quickly assembled. If the chosen sections when placed together do not fully occupy the space required, simply space them out, leaving even gaps between. These spaces are then covered on the front by a special cover moulding called "pilasters." The gaps at top of the floor units are filled with filler pieces made of plywood. Then the entire top can be finished with linoleum shown on this page, or other material.

The prefabricated Cupboard Units are made in various styles, and widths, which with the "pilasters" and fillers, will build a cabinet of practically any desired overall width or design. The individual cupboards are strongly made of smooth lumber and plywood painted two coats of flat white. In width and height they're designed to accommodate modern stoves and refrigerators. All cupboard and drawer units are sent ready-built with doors, shelves, and drawers carefully hung and fitted. Floor units are made with fronts, tops and bottoms only. Plywood sides can be ordered extra if wanted to divide the lower portion into sections or to close the end of a cupboard that is exposed. The Upper Wall Units are made with sides, tops and bottoms with shelves and doors fitted in. All units made with open backs, to be set against a wall which will form the back. If plywood wanted for backs see plywood panels, page 20.

How with Prefabricated Units HOW TO PLAN YOUR CABINET

To plan your cabinet, first decide where it is to be placed, then measure the exact length in inches and figure as closely as possible the Floor Units that will most nearly fill the space. Next decide on the pilasters and filler strips required to make up the extra few inches of the space to be filled. It is a good plan to lay it out on a sheet of paper, or better still, mark it out on the kitchen floor. When you have decided on the floor units needed, make a list and add the upper units in the same series of widths, adding the necessary pilasters for top and bottom and filler pieces for the counter top.

In new buildings it will help greatly if the kitchen walls are laid out to suit the various cupboard unit widths, but in modernizing existing kitchens a careful laying out of the work will be necessary. Remember you can always make up an extra inch or two by using wider filler pieces.

All standard units are shown on this page with full details of sizes and South Zone prices. In North Zone add 40c. West Zone add 65c per unit.

Floor Units are made 36" high and 23½" front to back, with toe recess at floor and in widths as listed at left. Upper Cupboards, except as noted, are 36" high and 12" front to back, widths as given at right.

Broom Closet is 7'6" high, 1' 6" wide. Pilasters and Filler Pieces are supplied in various widths from ½" to 1½" in sets for top or bottom units.

The new Revolving Corner Shelves are available for both top and bottom units.

OTHER ITEMS NEEDED

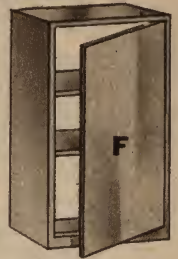

So that each customer can order fittings to suit his own fancy, Cupboard Catches, Door and Drawer Handles are not included in the price of Cupboard Units. These can be ordered from this catalog and shipped with your cabinet. To finish the counter top use a smooth-surfaced material such as linoleum trimmed with plastic or metal mouldings. If you're using the sink unit, see prices of Sink and Fittings in Plumbing Section.

UPPER UNITS

All Upper Units 36" high, 12" deep except as noted. South Zone prices given. North Zone add 35c. West add 60c per unit.

PURITY-OUTSIDE FINISHES

PURITY HOUSE PAINT GUARANTEED FIVE YEARS

You can choose Purity House Paint with every confidence in its high quality and durability. It is specially made for us to strict standards of excellence and purity, and we offer it under this guarantee. "Use Purity House Paint according to directions printed on the can and we **GUARANTEE FIVE YEARS PROTECTION.**" Purity is a heavy bodied paint that will stand considerable thinning for the first coat, it brushes out smoothly, covers well and dries with a tough, glossy finish to give long lasting protection to your buildings.

GALLON COVERS 700-800 SQ. FEET

Because of its unquestioned quality and covering ability Purity House Paint is economical in use, a GALLON will cover 700-800 feet **ONE COAT** on new work or old work in good condition. On new work we strongly recommend the use of Purity Lumber Life Primer as a first coat. See below at left.

HOW MUCH When ordering paint for a frame house, take distance in feet **TO ORDER** around the house, multiply by height to eaves, plus 2 feet for cornice. Divide by 800 or 700 depending on surface condition, to get quantity for **ONE COAT**. Trim color is estimated at about one gallon to each five gallons of body color.

Price per QUART **1.25**

Price per GALLON **4.50**

SCREEN PAINT

5227—Paint window and door screens before and after use, with our Purity Screen Paint. It's specially prepared to prevent clogging the mesh, checks rust and makes screens last longer. A pint will do about 75 sq. feet of screen. Price per HALF PINT, BLACK only **40c**

Price per QUART **1.25**

PURITY MEANS HIGHEST QUALITY

The Halliday "Purity" line of exterior and interior finishes assures you of Paints, Varnishes and Enamels of the very highest quality at moderate prices. All Purity products are made in Canadian factories, under strict supervision using ingredients known and proven to be the very best for the purpose. We stand behind every can you buy with a guarantee of complete satisfaction or money refunded. Choose "Purity" with confidence for all high class work, it's your assurance of highest quality, biggest value and maximum economy.

PURITY LUMBER-LIFE PRIMER

5222

The use of our Lumber-Life Priming Paint as a first coat on new work makes your paint work last longer. It is made by adding PENTOX Wood

preservative to our regular Purity Quality Paint. It gives positive protection against rot and decay caused by dampness, and adds much to the life of woodwork exposed to moisture or wet conditions. Lumber-Life Primer checks peeling and blistering of the finished surface, and saves a coat of paint. A GALLON covers about 400 sq. feet **ONE COAT**. Price per QUART, **1.65**

PURITY INSIDE FINISHES

PURITY THREE STAR ENAMEL

SUPER-GLOSS. CONTAINS NO LEAD

Here's a new, much improved Enamel for inside use that gives really 'super' results, an enamel in new brilliant colors that dries with a high long lasting, glossy, waterproof finish. It's pleasant and safe to use because it contains no lead and has no objectionable odor. Use it to bring new colorful beauty to inside woodwork, doors, furniture, kitchen cabinets, cupboards, children's toys.

UNUSUAL COVERAGE

52254—Purity Three Star Enamel is economical in use because a small amount covers a large surface, a quart will beautify 150 to 200 sq. feet ONE COAT, it goes on easily, levelling off as smooth as porcelain enamel and will not check after drying. Made in a range of beautiful colors including a WHITE that stays white. Be sure to state color when ordering. See list at right. We pay freight orders of \$5 or over.

NEW PURITY STAR FINISHES

These new Purity 3 Star Finishes introduced to Halliday customers for the first time in this catalog, represent an important advance in the quality of paint products, the result of years of careful research. Most of these improved finishes were developed by a clever European chemist, using new and better ingredients still too scarce for mass production, but by placing orders early in the season we are assured of a sufficient supply for our customers. Purity 3 Star Finishes have three outstanding advantages to recommend them, features that place them ahead of most paint products now on the market.

- ★ **MORE BEAUTIFUL COLORS.** No expense has been spared to obtain rare color pigments of great purity and sunfastness.
 - ★ **EXTRA HARD.** The special base and resins used produce finishes that dry with cement like hardness and durability.
 - ★ **GREATER COVERAGE,** because of the better ingredients, these finishes have greater covering and hiding power. Each brushful brushed out to a thin coat covers even darker surfaces smoothly.
- In addition, Purity 3 Star finishes are easy to apply without leaving brushmarks, and are free from objectionable paint odor. Truly washable too after allowing a short period for thorough drying. For the best results in home decoration we recommend these new finishes and guarantee them fully.

FRESH COLORS IN NEW FLAT FINISH

52258—You'll get fresh new beauty and richer color effects in your rooms when you decorate with our New Purity Three Star Flat Enamel. At last a fine quality wall paint that provides a really hard, washable finish, free from gloss, and drying in about four hours with a rich, flat, velvety appearance. A quart covers about 200 sq. feet **ONE COAT.** See colors at right.

REZ

SEALER AND PRIMER FOR PLYWOOD, WOODWORK DOORS

Rez Sealer and Primer is a synthetic resin product, specially formulated to protect wood from moisture. Its use as a primer on certain woods checks annoying grain raise and assures a more even finish in the final treatment with paint or stain. Rez is particularly recommended as a primer and sealer for plywood surfaces, doors etc. Outside doors should be treated with Rez before being hung.

EASY TO APPLY

52267—Rez can be used as a foundation for all wood finishes, and may be applied with a brush or with a soft cloth. It seals and primes the wood surface leaving it in best condition to receive the finishing coat of paint, varnish, or stain. Rez is economical to use, a gallon will treat about 600 sq. feet of surface, it makes paint go further and last longer.

Price per QUART..... **1.50** Price per GALLON..... **4.65**

NOTE: Rez must not be used with lacquer finishes.

WATERPROOF YOUR BASEMENT

Here's wonderful news for home and property owners bothered with damp basements caused by seepage of water through cellar walls. A simple, easy treatment that anyone can apply with amazing results, and at a very reasonable cost. Three separate treatments are offered, (1) QUICKSET WATERPROOFING is particularly recommended for sealing leaks at floor and wall line, can be used even when leaks are under water. (2) FLURESEAL WATERPROOFING for treating rough and porous masonry (cement or cinder blocks). Can be brushed or trowelled on, positively seals the surface. (3) TRICOSEAL WATERPROOFING, for use on hard smooth and dense masonry (concrete, brick or stucco). Can be brushed or trowelled on inside or outside surfaces. Choose the type of treatment that suits your conditions, use it according to easy to follow directions, and you'll be delighted with results.

QUICKSET WATERPROOFING

52100—Quickset Waterproofing is a gray cement to mix with water, hardens in 3 to 5 minutes. It is non-shrinking and stops flow of water even under pressure. A little goes a long way. Full directions on package.

1 LB. PKG.	5 LB. PKG.	10 LB. PKG.	50 LB. PKG.
72c	3.25	5.85	24.95

FLURESEAL WATERPROOFING

Fluresal is a slow setting cement to be mixed with water and applied to cement block or cinder block walls. Two coats needed, requiring 2 1/2 lbs. for every 10 sq. ft. Quickly stops moisture seeping through walls. Can be painted over without further priming if desired.

	5 lbs.	10 lbs.	25 lbs.	50 lbs.	100 lbs.
52102 GRAY COLOR	1.70	2.95	6.95	10.95	19.70
52104 WHITE	1.95	3.25	7.75	11.95	21.50

TRICOSEAL WATERPROOFING

Tricoseal seals hard dense surfaces like cement walls, brick or stucco but should not be used on a glazed, non-porous surface. It penetrates and hardens into a decorative semi-gloss finish, permanently waterproof. Will not wear off, blister or peel. 1 1/2 lbs. cover 10 sq. ft. TWO COATS. Just mix with water and brush or trowel it on.

	5 lbs.	10 lbs.	25 lbs.	50 lbs.	100 lbs.
52106 GRAY COLOR	2.25	3.95	9.75	17.95	32.25
52108 WHITE	2.35	4.25	9.95	18.95	33.95

For larger quantities, please write for prices. Leaflet describing these amazingly successful waterproofing treatments more fully, free on request.

NOISELESS, TROUBLE FREE SPIRAL SASH BALANCES

If you're building a new home for yourself or if you make a business of building for others, you'll be glad you made this "discovery". For these new Spiral Sash Balances really save a lot of labor, time and money. They are simple to instal, easy to adjust, durable and trouble free. Windows slide up and down easily and noiselessly.

HERE'S HOW YOU SAVE

When using these easy-working balances on your windows, you save the time and labor cost of making drafty sash weight boxes; you need no pulleys in your frames, no clumsy sash weights and no cords, and you have smoother, easier working windows in the bargain. The operating unit comes completely enclosed in a neat steel tube, which is set into a groove in the side of sash, out of sight when in use. Easily installed in new or old sash.

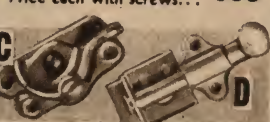

HOW TO ORDER

Spiral Sash Balances are sold in complete sets of FOUR for use when both upper and lower sash are to open, or in PAIRS when only one sash is to open. When ordering give glass size of each sash, width first then height, we send balances to suit. Printed directions sent and all screws.

50266—Price PAIR **1.33** 50267—Price SET **2.65**
4 balances
For sizes not catalogued sash shipped from factory. Write for prices.

HEAVY GAUGE GALVANIZED METAL ROOFING

If you've been waiting to renew old worn out metal roofs, or for the opportunity to obtain good quality roofing for new barns or other buildings, here it is at Hallidays low, direct-to-you prices. And remember we pay all freight charges to your nearest railway station.

A DEPENDABLE LONG LIFE ROOF SHIPPED DIRECT FROM FACTORY

To save extra handling costs we ship our Metal Roofing direct from the factory to you, of course you benefit from this saving and it takes only 2 weeks for shipment. All sheets are prime quality, copper bearing 28 B.W.G. Steel 36" wide galvanized for extra protection and corrugated to standard 33" width. Prices are based on FLAT (material area) MEASURE so that a square actually covers 70 sq. ft. on roofs 80 sq. ft. on walls. Sheets lay 29" to weather on roofs, 31" on walls. If in doubt how much to order please send sketch of roof giving length of ridge and rafters, and state whether material is required for one or two sides.

HEAT CIRCULATING FIREPLACE FORMS

Your new fireplace can be made into a real heating unit if you build it around one of these Circulating Fireplace Forms. The special construction provides a means of utilizing the heat that goes up the chimney in the ordinary fireplace. The Circulating Fireplace operates like a hot air furnace, cool air is drawn through the lower openings on each side of the fireplace, heated over the back and sides of the chamber and then discharged into the rooms through the upper openings. Thus warm air is circulated throughout the rooms making every corner warm and cosy.

INSULATED CONSTRUCTION

The use of these Circulating Fireplace forms saves construction costs and simplifies the task of building the fireplace. The unit is made of heavy sheet steel with damper built in and properly proportioned smoke chamber above. It is placed in position then the stone or brick fireplace built around it. We supply insulating material to conserve heat, and serve as a cushion between the steel unit and the masonry work. No firebrick is necessary except for the hearth. Directions sent.

TWO SIZES — FREIGHT PAID

8 REASONS WHY YOU SHOULD USE NO-CO-RODE DRAINAGE PIPE

NO-CO-RODE Pipe is your best choice for all drainage work, and is particularly useful for Septic Tank disposal fields, subsoil drainage etc.

NO-CO-RODE Pipe is immensely strong, yet light and easy to handle.

NO-CO-RODE Pipe does not corrode or disintegrate, withstands freezing and thawing.

NO-CO-RODE Pipe is easy to install it can be cut with a saw, no skilled help needed.

NO-CO-RODE Pipe contains coal tar pitch which tends to repel tree roots. Joints on solid pipe are root proof.

NO-CO-RODE provides trouble free drainage once installed, and will last a lifetime.

NO-CO-RODE Pipe is flexible and will take contour of ground.

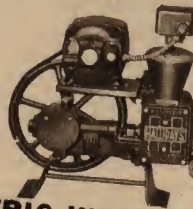

NO-CO-RODE Pipe costs less to ship.

INSTRUCTIONS FREE

You can do the work yourself if you wish, we send detailed instruction leaflet with every order for Septic Tanks or NO-CO-RODE Pipe. A copy will be sent on request if desired.

WITH NEW AERATOR FITTING

The latest improvement for the above taps. A special aerator is attached to the faucet spout which mixes air with the water. Turns the above taps into genuine anti-splash faucets the water flows out in a gentle stream spreading smoothly over everything it contacts. Absolutely splashless and makes a great saving in soap.

30180—New Aerator supplied with Swing Spout Faucets above add to prices

MODERN HEATING *for*

DUPLEX GRATE

This is the new ball bearing Duplex Grate supplied with these furnaces. Easy to operate, easily removed if needed, no grinding of clinkers, because they are dumped into ash pit,

All materials offered in Halliday catalogs are chosen with the greatest care to insure our customers the fullest value and the most complete satisfaction in their dealings with us. This protective policy has built up a "customer confidence" that we regard as one of our biggest assets, and because heating equipment is such an important item in the home and requires the expenditure of a considerable sum, we use our expert knowledge and wide experience with home heating requirements even more carefully when selecting Hot Air Furnaces to recommend to customers requiring them.

SMART SQUARE DESIGN CASING EASY SHAKING GRATES

New Idea All Steel Furnaces are easy to instal, simple to operate and provide a continuous and ample flow of warm air with little attention. The new design duplex grates equipped with ball bearing annular grate ring are easily operated by the waist high shaking lever. The fire pot is designed to hold a long burning fire and the ash pit below is large and roomy. Note the clean lines of the furnace body and the new, smartly designed square casing, it will improve the appearance of any basement or furnace room.

MODERN ALL STEEL FURNACE POSITIVELY GAS AND DUST TIGHT

These smart looking New Idea All Steel furnaces mark a really important advance in the science of hot air home heating. An outstanding feature is the heavy WELDED steel construction throughout, no "Cast Iron to Steel" joints to be filled with cement, absolutely leak proof. They are ideal for coal firing by hand or for easy conversion to automatic feed for coal or oil. The deep well hole in the radiator provides extra heating surface and long fire travel assures efficient, economical heating.

FOR 5 TO 6 ROOM HOUSE (6,000 CUBIC FEET) PRICE COMPLETE WITH CASING

31218—New Idea All Steel Furnace as described above suitable for average homes of 5 to 6 rooms, up to 6,000 cubic feet, overall size of casing about 39" x 27", height 64". Takes 8" smoke pipe. IMPROVED PIPELESS FURNACE SQUARE PLAN HOMES, HALLS, SCHOOLS, CHURCHES, STORES

These economical and efficient, Pipeless Furnaces are especially useful in the smaller types of homes being built today, where the floor plan is more or less square. They work well in square plan one or two storey houses, halls, schools, churches etc., providing a plentiful supply of warm air to circulate throughout the building.

In the two storey building it is necessary to leave upstairs doors open, at least during the day to ensure good circulation. These are the well known New Idea Pipeless Furnaces, built to provide ample warmth with a minimum of fuel. They are easy to instal, requiring only handy man knowledge and skill. Should be placed as near to centre of building as possible. In two storey houses the floor grating is usually placed in the hallway or close to it.

WELDED STEEL RADIATOR, CASING INCLUDED

3119—New Idea Pipeless Furnace for average square plan home of 5 to 6 rooms (6000 cubic feet). Strongly built of best materials and provided with the new all steel welded radiator, and 19" fire pot. We supply the Furnace complete with galvanized outer casing, and large 29" x 29" floor register. Directions sent. Takes 7" smoke pipe which must be ordered extra. Our price **268.00**

NORTH ZONE.....	273.00	WEST ZONE.....	277.00
-----------------	--------	----------------	--------

HOME HEATING INFORMATION

If in doubt as to what size of furnace to order write us for information. Send sketch of floor plan if possible showing number and size of rooms, height of ceilings, location of windows etc. Also show location of chimney, direction of floor joists and note the wall construction. Our home heating department will answer your letter promptly.

ORDER YOUR STORM WINDOWS EARLY. DON'T BE DISAPPOINTED

HOMES OF TO-DAY

You can rely on these efficient New Idea Furnaces to supply an ample flow of warm air to keep the average five to seven room home at comfortable temperatures even on coldest winter days. They are engineered to extract the maximum heat from the fuel used, and will prove unusually economical to operate.

This New Idea Furnace was especially designed to provide a high quality cast iron and heavy welded steel Furnace at reasonable cost. It is solidly built of best materials and can be depended on to give long service.

EXTRA LARGE RADIATOR. CASING SUPPLIED

For the average small home of today you can choose this fine piece of heating equipment with confidence. Note the rugged two-piece cast iron fire pot, with lock tight joint between fire pot and radiator.

The heavy welded steel combustion dome and large crescent shaped radiator are features that provide extra large heating surfaces assuring maximum performance at all times. You'll find this Furnace easy to operate and easy on fuel. All Furnaces supplied complete with galvanized outer casing.

FIVE TO SIX ROOMS

31820—New Idea Series 800 Furnace suitable for average 5 to 6 room home, shipped complete with galvanized outer casing, overall size 40" diameter by 58" high, to be assembled by customer. Price delivered in SOUTH ZONE. **183.40**

NORTH ZONE. **187.90** WEST ZONE. **192.90**

Smoke pipe not supplied. Order 7" pipe from page 55.

FURNACE HUMIDIFIER

31111—Instal one of these automatic furnace Humidifiers, and enjoy a more healthful atmosphere in the home. It's easy to instal on most hot air furnaces and needs no attention. Supplied with copper tank and pan, size 12" x 3" x 2", brass float valve, 5' copper pipe, needle valve and pipe clamps for 1/2" pipe, also five fiber-glas evaporating plates. Our low price complete. **21.50**

Extra Plates, each. **50c**

*Cleaned
Conditioned Air
Now at
Small
Cost*

With this New Idea Air Conditioning Unit installed, all air passing through the heating system is first filtered, and cleaned, then humidified as it passes through the heating chamber of the furnace. The air reaching the living quarters is clean air, moistened and warmed in winter months. In summer the house is cooled by circulating the cooler air from basement.

The air conditioned home is a cleaner, more healthful home, furniture, rugs, hangings, etc., last much longer, it is more comfortable throughout the year, and requires less fuel to keep it so. You'll feel the difference as soon as the motor starts.

INEXPENSIVE - NEEDS LITTLE ATTENTION

3162—With 25 cycle motor. 3163—With 60 cycle motor.

The New Idea Air Conditioning Unit costs very little to instal and to operate, and being largely automatic requires very little attention beyond the replacing of air filters from time to time.

We send this modern Air Conditioning Unit complete and ready to instal. Each unit equipped with Centrifugal Fan, with V belt, variable speed pulley, Automatic Furnacestat regulating the fan, and 1/4 H.P. Motor. Two air filters supplied size 16" x 25" x 2". This unit is fully enclosed in a heavy steel casing finished in maroon enamel. Our price delivered in SOUTH ZONE. Suitable for Furnaces up to 22" firepot. **121.75**

North and West Zones. **124.25**

For larger sizes please write for prices. Replacement Air Filters shown at left.

DUST-STOP FIBERGLAS AIR FILTERS

5052—Your Air Filters should be regularly examined twice a year and replaced with new ones when necessary. They are low in cost and easy to replace. These are the genuine Fiberglas Dust Stop Filters suitable for our air conditioning unit at right. Sizes 16" x 25", 16" x 20", 20" x 20", all 2" thick. State size wanted. Price each. **2.20**

Also size 20" x 25", price each. **2.55**

ORDER YOUR STORM WINDOWS EARLY. DON'T BE DISAPPOINTED

WARM COMFORT FOR WINTER DAYS

For owners and builders of small houses, 7,000 to 9,000 cubic feet, this modern heating unit presents outstanding value. It's designed to render long service with a plentiful flow of warm air, needs little attention and is easy on fuel. A modern "NEW IDEA" all steel, electrically welded furnace with up to date construction features usually found in higher priced units, positively gas and dust tight, with large firebrick lined fire pot and roomy ash pit, and easy working bar grates.

Famous CEDAR GRAIN ASBESTOS SHINGLES

THREE COLORS AND WHITE

Now you can choose the famous Cedargrain Asbestos Shingles from a range of soft beautiful colors; Green Tone, Brown Tone, Gray Tone, and Dover White. The Dover White shingles have a raised grain pattern. The new improved colored shingles have a smooth surface, with the color cleverly applied with raised grain effect. New, brighter and more attractive colors used throughout giving an appearance of greater depth to the textured surface. Cedargrains are first choice for the man who wants maximum beauty and fire safety with minimum upkeep cost. They're made of genuine Canadian Asbestos and Portland cement, cannot burn or decay. They are not affected by extreme weather conditions and never need painting. They are easy to apply on new buildings and can be laid over old wood siding or shingles.

FOR SIDE WALLS ONLY

NAILS AND BACKER STRIPS INCLUDED

Cedargrain Asbestos Shingles are intended for use on sidewalls only, of homes, cottages and other buildings. Each shingle is 12" x 24" and about 3/16 inch thick, made with a slightly waved edge for better appearance. They're shipped in factory bundles containing 19 shingles, three bundles cover 100 sq. feet of wall, weight about 185 lbs. Prices include backer strip and special rustproof nails for exposed nailing. Other nails must be ordered extra.

1243—DOVER WHITE 1283—GREENTONE
1284—BROWNTONE 1285—GRAYTONE

ORDERS SHIPPED PROMPTLY

In our warehouses at Burlington, Ont., we carry the largest and most diversified stocks of high grade building materials in Eastern Canada. We aim to have everything on hand for quick shipment as soon as your order is received, and to a large measure we live up to this standard of service. In this way we try to protect our customers against shortages, but we regret that we have no way of foreseeing what materials, or goods will suddenly be placed on a restricted basis, or become difficult to obtain for other reasons.

You may be sure that, if it's obtainable anywhere, Hallidays will be in a position to supply it within a reasonable time. If not, we will notify you promptly.

ABOUT OUR PRICES

It has always been our policy to supply highest quality material at the lowest possible prices. This policy is being maintained and customers may be assured that prices will not be advanced unless absolutely necessary and that any reductions that may be possible will be passed on without delay.

ASPHALT SHINGLES FOR YOUR ROOF

COLOR with Lasting Protection

Home owners everywhere choose Asphalt Shingles for dependable long lasting roof protection, colorful appearance and fire safety. Here we offer two most popular styles, suitable for homes of every type at prices that mean a decided saving. We guarantee all our shingles to be the very best quality, full weight and measure.

NU-KONOMY SHINGLES POPULAR LOW COST LOCK-DOWNS

These are the popular, lock-down type Shingles especially designed for laying over old wood shingles. Just right for re-roofing jobs, but may be used on new roofs if underlaid with waterproof felt. These NU-KONOMY SHINGLES are all first quality in material and workmanship, each shingle 16" x 16". Packed two bundles to the square, weight 125 lbs. We deliver orders of \$5 and over freight paid to your nearest station.

CHOICE OF THREE COLORS
